DBMS MINIPROJECT ER DIAGRAM AND RELATIONAL SCHEMA SUBMISSION

NAME1: SHAIKH SANIYA ALI	SRN1 : PES1UG23CS533
NAME2: SHALMALI V RAM	SRN2 : PES1UG23CS535
DOMAIN: DYNAMIC EVENT PLANNING	DATE: 29/8/2025

Problem statement:

Dynamic Event Planning with Attendee Preference Learning

Domain: Event Management + Machine Learning

Preference learning algorithm - learn what types of events students actually attend vs register for

Optimal timing prediction - suggest best dates/times based on academic calendar and past attendance

Resource allocation optimization - predict food quantities, seating arrangements based on RSVP patterns
